International Journal of
SATELLITE COMMUNICATIONS (*Int. J. Satell. Commun.*)

CONTENTS

VOLUME 3, ISSUE Nos 1–4

ISSUE Nos. 1 and 2 January–June
(Special Issue on the INTELSAT TDMA/DSI System)

Editorial 1

INTRODUCTION TO THE INTELSAT TDMA/DSI SYSTEM

Frontispiece—The INTELSAT TDMA/DSI System: The Start of a Digital Revolution: R. R. Colino 3

The INTELSAT TDMA/DSI System—An Overview of the Special Issue: B. Pontano 5

INTELSAT TDMA/DSI System: Implementation and System Management: R. Parthasarathy . 11

SYSTEM DESIGN

COMSAT'S TDMA Traffic Terminal: M.C. Benjamin and W. M. Bogaert 15

The Acquisition and Synchronization Control Procedures for the INTELSAT TDMA System: R. Bedford and Y. Ishi 27

INTELSAT TDMA/DSI Burst Time Plan Development: C. King, P. Trusty, J. Jankowski, R. Duesing and P. Roach 35

TDMA TRAFFIC AND REFERENCE MONITORING STATION DESIGN

Reference Terminal Equipment for the INTELSAT TDMA System: A. Saburi, T. Mitani, Y. Ishi, H. Takai and N. Takatsukasa 45

INTELSAT TDMA System Monitor: J. Barnett and J. F. Phiel. 57

INTELSAT Operations Center TDMA Facility: G. Hodge, R. Johnson, W. Cook and K. Saralkar 71

Design Architecture for a High Performance INTELSAT TDMA/DSI Terminal: P. Gaske and S. Thompson 77

The French TDMA Terminal: C. Bareyt, A. Beaucent, J. Salomon, D. Vautier, C. Sergent, A. Bernard, L. Kerromes, J. Meunier and F. Rancy 85

NEC's Traffic Terminal Equipment for the INTELSAT TDMA System: A. Saburi, G. Oshima, R. Saga, M. Atobe, S. Shigaki and K. Yoshida 101

120 Mb/s TDMA Traffic Terminal for use in the INTELSAT System: M. Nakanishi and H. Itoh 113

The Italian TDMA-DSI Terminal for the INTELSAT System: C. La Rocca, F. Menciotti, G. Alletto and D. Argento 129

A 120 Mb/s QPSK Modem Designed for the INTELSAT TDMA Network: R. de Cristofaro and A. L. McFarthing 145

TESTING, TEST EQUIPMENT, OPERATIONS AND MAINTENANCE

Alignment, Testing and Maintenance Principles in the INTELSAT TDMA/DSI Network: A. S. Oei, R. J. Colby, R. Parthasarathy and A. L. Stimson 161

Testing and Maintenance of INTELSAT TDMA Traffic Terminals—A Manufacturer's Perspective: J. M. Keelty 167

The INTELSAT TDMA Burst Mode Link Analyser: P. Mahoney 171

An Introduction to the PDTS (PCM/DSI Test Set): Design Principles and Application in the INTELSAT TDMA/DSI System: D. K. N. Lai 179

The TDMA Tutor® Computer-based Training Concept: R. A. Gough 185

ISSUE No. 3 July–September

Editorial 201

Inaugural Lecture: Towards the Intelligent Bird: B. G. Evans. 203

Satellites Versus Fibre Optic Cables: J. Crispin, J. M. Cummins, R. Lemus and J. Reyna 217

Ku-band Satellite Digital Transmission Systems: W. E. McGann 221

Measurements of the Time Statistics of FMTV Spectra and TV Interference into FDM/FM Carriers: N. Nguyen, B. Mazur and S. Prasanna 229

The Variability of the Ionospheric Total Electron Content and its Effect on Satellite Microwave Communications: R. S. Wolff 237

COMMENTARY

The Cases **For** and **Against** Deregulating the Global Satellite Network: D. J. Markey and R. R. Colino 245

BOOK REVIEWS 247

ISSUE No. 4 October–December

Burst Interference in TDMA Radio Systems: Z. Lei, M-X. Chen and K. Feher 249

INTELSAT Earth-station Standards—A New Look to an Old Theme: P. T. Thompson and L. M. Buchsbaum 259

Method and Instrumentation for the Precise Measurement of Satellite Transponder Saturation Point: R. Bauer, W. Steinert and W. Würscher 265

The Performance of Synchronous Direct-sequence Spread Spectrum Signals Replicated in Several Frequency Bands: V. Mangulis 271

Minimization of Faraday Depolorization Effects on Satellite Communication Systems at 6/4 GHz: R. S. Wolff 275

Spread Spectrum for Low Cost Satellite Services: T. T. Ha 287

Satellite Communications Planning and Equipment Manufacturing in Latin America: A. Serrano and J. C. Pomalaza 295

TUTORIAL

Transmission Systems: An Introduction to Frequency Modulation—Part 3: W. R. Calvert . . . 301
